Report

National Webinar On Floristic Diversity and Ethnobotany of Himalayas and Western Ghats
Jointly Organised by SNM College, Maliankara, Kerala and Netaji Nagar Day College,
Kolkata, West Bengal on 16th October, 2020

One day National Webinar on ***“Floristic Diversity & Ethnobotany of Himalayas and Western Ghats”*** which was jointly organized by the SNM College, Maliankara, Kerala and Netaji Nagar Day College, Kolkata, West Bengal.

The distinguished speakers for this webinar were Prof. A.P. Das, Department of Botany, Rajiv Gandhi University, Arunachal Pradesh and Dr. A. Sujanapal, Senior Scientist, Kerala Forest Research Institute.

Patrons of both the college were as follows:

SNM College: Mr. B. Rajeev (President, HMDP Sabha), Mr. Bijil Kumar T.S. (Secretary, HMDP Sabha) and Mr. Bose M.R. (The College Manager)

Netaji Nagar Day College: Dr. Abhijit Majumdar (President of the Governing Body, NNDC) and Principal Dr. Sonali Banerjee Jash

Participants were from various states took part in this webinar (Feedback list attached).

Joint Programme Convener: Dr. Bhumika Pradhan and Dr. Sanilkumar MG College

Aim: This webinar was very enlightening for all of us in inculcating the dynamics of Biodiversity and exchange of knowledge and understanding of a different view about the taxonomical, ethnobotanical knowledge from Eastern Himalayas and the Western ghats was done. It was a great opportunity for all participants, especially the students to be in such a unique platform.

Objectives:

1. The webinar on the topic "Floristic Diversity and Ethnobotany of Himalayas and Western Ghats" will be available or attended by a nationwide audience especially from Kerala and West Bengal, where faculties, researchers, students of Botany and related fields of Biology will come together.
2. Through the two lectures by the experts, the faculties and researchers from both the states and others will find it amusing and a unique way to gain knowledge on the biodiversity and

the ethnobotany of the flora of both the biodiversity hotspots in the same platform which will definitely help in their academic and research related work.

3. Moreover, the topic covered in the webinar carries a very high value/grade/marks in the current and the old UG and PG syllabus under CBCS which will highly benefit the students of Botany, Biology or related subject and hopefully enough interest is generated in the students by the two lectures which will motivate them in procuring higher studies in this field.

Theme:

Biodiversity is the variety and variability of life on Earth. Biodiversity is typically a measure of variation at the genetic, species, and ecosystem level. The immense variety of life on Earth, commonly referred to as biodiversity, forms the backbone of societies all over the globe. Biodiversity, divided into genetic biodiversity and ecological biodiversity, fully encompasses the diversity of the habitats and ecosystems that people the world over call home. The continued health and preservation of global biodiversity cannot be understated as we look towards forging new pathways to creating a sustainable, green future. **The Himalayan mountains range** has emerged among the most sensitive ecosystems under the global climate change (CC) scenario. Impacts of CC are realized all across the physical, biological and socio-economic components of the ecosystems. It has been anticipated that the richness of endemic species with restricted distribution and life support values (goods and services) of this global biodiversity hotspot is highly vulnerable under the changing climate.

On the other hand, situated in the south, **the Western Ghats**, the area is one of the world's ten "hottest biodiversity hotspots" and the biodiversity found here even rivals that of the Amazon. The area is ecologically sensitive to development and was declared an ecological hotspot in 1988 through the efforts of ecologist Norman Myers. **Biodiversity**, the diversity of life on Earth, is essential to the healthy functioning of ecosystems. Habitat loss and overexploitation, driven by our rapid population growth and unsustainable consumption patterns, are the primary causes of biodiversity loss which is now happening up to ten thousand times faster than for millions of years before. Biodiversity, the variation of life on Earth, is a major factor in nature's resilience. In a bio-diverse ecosystem, if the environment changes and some organisms can no longer thrive, others can take their place and fulfil essential functions. **Ethno botany**, the research field of science, has been widely used in documenting the indigenous knowledge of using plants and providing an inventory of

useful plants from local ethnic people. Ethnobotany is the study of a region's plants and their practical uses through the traditional knowledge of a local culture and people. Experiences gained from ethno botanical approaches of traditional medicinal studies and the documentation of the local customs involving the practical uses of local flora for many aspects of life, such as plants as medicines, foods, intoxicants and clothing has immense value.

llam

ok forward in future for such type of webinar.

ic.

d experience of the eminent speakers. Thank you so much to the organizers.

iversity in different plant species

missed some part... but overall it was insightfull and a great experience.

al session

ow many interesting things about plants from different part of our country. I think it will be more interesting if more universities collabc

oes to the respected sir and all the organizers. And please held some more excellent webinar in coming days. Thank you once again.

but technical issues should be resolved.

ticipants.

etwork problem... otherwise it was very beneficial, knowledgeable, interesting....very helpful for our studies too... thanku so much... rega

d to enrich our knowledge

tive for students

rovided to all because of technical issues

ossible, please organise certain webinars on other botanical aspects as well
formation and knowledge .

s Dr A B Das & Mr Sujanpal ji.

g the scholars and teachers so that in future we can improve our research work. Actually once we attend the workshop or webnar then

ninar

doing the good work.

Further research. I enjoy this webinar. Thank you so much all the respected teachers and organizing committee.

Such a valuable talk. Thank you so much.

Same

Dr. P. D. Sir is a legend..he is a repository of knowledge. Taxonomy is he himself.

Dr. Sir link and teach something practical knowledge also. For eg. How to a good herbarium or other types of project.

participate or take part together.

ards:-Neha Kapri

most of us disappear, so plz maintain the link so that we can share our problems related to our research work. Thanks
